

## Steps Done to Build the Agatha Christie Author Portfolio Website

1. **Created a Custom Template** to ensure consistency and flexibility across all pages.
2. **Used Experience Fragments** to integrate a standardized header and footer seamlessly throughout the website.
3. **Styled Components** to match the theme of the website, ensuring a visually appealing and immersive user experience.
4. **Showcased an Award Ceremony** using a teaser component with an image, title, description, and CTA linking to a detailed news page.
5. **Dedicated a Section for the Author's Works**, featuring a book component that dynamically fetches books from the content repository.
6. **Highlighted a Notable Quote** from Agatha Christie using a text component to emphasize her legacy.
7. **Presented the Author's Biography** using a teaser component, covering her early life, career, and achievements.
8. **Implemented Internal Links** within text components for seamless navigation across different sections of the website.
9. **Added Social Media Links and Image Components** in the footer for user engagement and connectivity.
10. **Displayed the Author's Published Books** in a structured list, with links leading to dedicated book detail pages.
11. **Developed a Navigation Menu** in the header for easy page access and included a dropdown for books.
12. **Enhanced User Experience with Hover Effects** to improve interactivity and engagement.

## Components Used in Building This Website in AEM:

- **Title:** Customizable page titles for clarity.
- **Text:** Flexible text components for adding content and linking to related pages.
- **Teaser:** Featured for showcasing the author's biography and book promotions.
- **Separator:** Used to create distinct sections for better readability.
- **Experience Fragment:** Integrated for maintaining a uniform header and footer across pages.
